# Case Walkthrough

Fixing a Weak Dataset

---

## Scenario

You receive a dataset with missing values, vague column names, and mixed date formats. The goal is a clean version that supports basic analysis.

## Step 1. Describe the Problems

### Column Problems:

### Missing Data Issues:

### Format Problems:

Other Risks:

## Step 2. Define the Fixes

Rename Columns To:

Fill or Remove:

Date Format Standard:

Scope Decision:

## Step 3. Produce a Clean Version

New Structure:
